General Description of Fiber Paths to Avoid
June 26, 2020

The Questions and Answers document from the Preproposal Conference provides the following response on areas which fiber paths:

4. Will fiber maps be provided for the areas where overlap needs to be avoided?

Existing fiber path maps were often provided to MARIA members by vendors and may not be available for distribution. MARIA will post a general description of areas that need to be avoided in the next few days. A full path placement discussion will be held during negotiations.

MARIA has no additional guidance to provide on general areas to avoid for fiber paths. Any potential conflicts will be discussed and dealt with during negotiations.
